## **Relentless Innovation, Consistent Support**

It's been said that a woman marries a man expecting he'll change, and a man marries a woman hoping she won't. Whatever your view, in any relationship, change is as inevitable as it is essential – yet consistency is a virtue. Tellermetrix understands the need for both.

We're passionate about responding to the rapidly evolving software needs of check cashers with relentless innovation and consistently superior service. As Tellermetrix President Richard Kelsky puts it: "We want our customers to feel they're waking up to a beautiful new relationship with us every day – a marriage of constant growth and extraordinary consistency."

"The challenge," he adds, "is to evolve while staying true to your founding philosophies. That means never losing sight of what Tellermetrix customers have come to expect: Rock-solid POS software solutions, a relentless commitment to innovation, and superior software and hardware support."

This unwavering focus on delivering what Kelsky calls "state-of-the-art simplicity" has pushed the company to continuously refine and enhance its core POS software even as it introduces groundbreaking new products. Echoing the company's 2011 ad campaign theme, Kelsky concludes, "That's how we keep our customer relationships fresh – year after year. It's how we separate ourselves from the pack."

Tellermetrix' innovations include optional software modules that feature integrated direct-to-bank electronic deposit, integrated bill payment and automated compliance support (MIL, SAR, CTR and OFAC/PLC). There's even special handling and compliance for commercial checks. And Affinity – Tellermetrix' latest creation – lets storeowners design, automate and integrate marketing programs into their core TellerMetrix POS platform.

Tellermetrix: The tools to manage your business, support your compliance program, build new customer relationships, and retain and revitalize your customer base – every single day.
